DETAILED ACTION

This office action is in response to the amendment filed on October 20, 2003.

Claims 68-90 are pending in this application.

The following rejections are maintained:

Claims 68-90 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 68, 138 and 143-153 of copending Application No. 09/932,677. It is acknowledged that applicant will address this rejection when it is the only remaining issue.

The following rejections are necessitated by the amendment:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 88-90 are rejected under 35 U.S.C. 103(a) as being unpatentable over El Nasser Ossman et al., Chem. Abstract 107:168619. The reference teaches 2,4-quinazolinedione compounds having anticonvulsant activity. The instant claim 88 excludes the reference disclosed compounds by the proviso statement, however, includes compounds wherein the ring nitrogen is substituted by H in place of the methyl (see RN 110679-30-6) or a propyl in place of the ethyl (see RN 110679-29-3), etc. Therefore, the instant claims include compounds that are homologs (i.e., differing by a -CH₂ group) of the reference compounds. One having ordinary skill in the art would have been motivated to prepare the instantly claimed compounds because such structurally homologous compounds would be expected to possess similar utilities. It has been held that compounds that are structurally homologous to prior art compounds are *prima facie* obvious, absent a showing of unexpected results. *In re Haas*, 60 USPQ 544 (CCPA 1944); *In re Henze*, 85 USPQ 261 (CCPA 1950).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the

THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
